

Hello Teresa,  
That's good to know about the exemption status for documentaries.  
This one definitely has nothing contentious about it.  
Here is the synopsis for Neither Confirm Nor Deny.

**SYNOPSIS**

During the Cold War, the CIA secretly raised a sunken Soviet nuclear submarine from the depths of the Pacific Ocean. The six-year operation included an intricate cover story by billionaire Howard Hughes. Drawing on declassified documents and never-before-seen interviews, NEITHER CONFIRM NOR DENY tells one of the highest-stakes, yet least known stories of the Cold War.

I can't provide a new link at present, as the previous one came with a built-in time limit which has now expired.

As I explained to Leonie, these things cost the film's producer and she is reluctant to pay for another one if it's not going to be actioned within the time-frame.

I did state this in my original email about the time-limit.

The producer is also reluctant to provide a link that can be shared beyond a time-frame, though I will see what I can do.

Thanks for your help.

Best –  
Mick
