ENVIRONMENTAL & PORT HEALTH

1.1 Port Health inspection charges

Port Health inspection charges are calculated annually on a cost recovery basis. This means that the charges represent the cost of staff salaries plus on costs; that is the cost of providing the office space and other equipment. Where legislation requires that sampling and analysis is carried out, charges will include the cost of any materials such as sterile scoops that are needed.

Where the cost of sampling and analysis is known this has been shown below, however, for many products the cost of the sample varies depending on size and the nature of the analysis. Samples that appear unsatisfactory will be subject to confirmatory testing to establish exact levels which will increase the cost.

The Charges
